

Build an AI Agent in Minutes

Step-by-step guide using Claude

Create Your Own AI Agent in Minutes

- Six simple steps, zero coding, every command included, no tech background needed

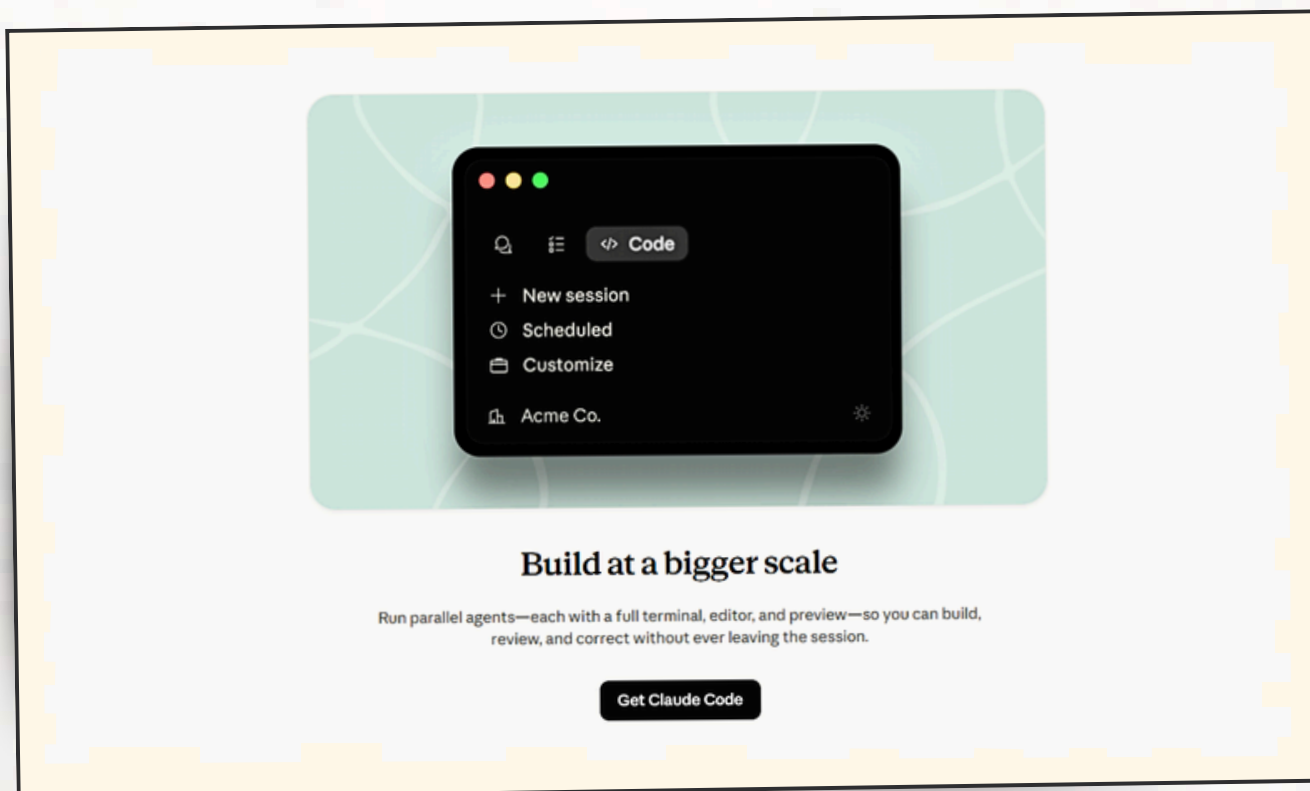

Let's start building, **swipe left**>>

Set Up Claude Code First

- This is your foundation, pick the version that works for you
- Takes under a minute, everything after this builds on top

Build Context

- The CLAUDE.md file is the first thing Claude reads before every conversation
- Write it once, every session uses it automatically
- **What to include:**
 - Your role
 - Your voice
 - Banned words
 - Output preferences

Prompt

Help me build my CLAUDE.md from scratch. Use Boris Cherny's CLAUDE.md as a starting template. Ask me about my business, voice, banned words, output defaults, and how I want you to work. Save the final file to ~/CLAUDE.md.

Copy & Paste

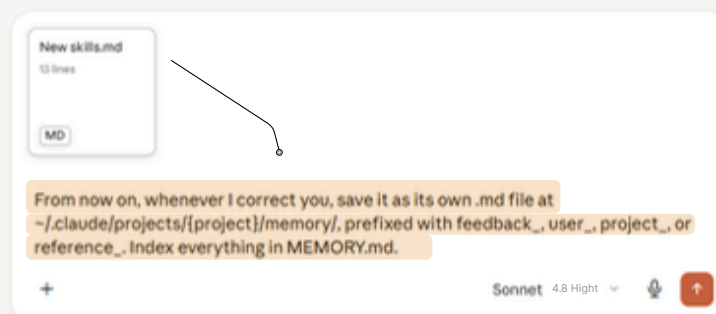

Teach Claude to Remember

- Every time you correct Claude, it saves a separate .md file
- The same mistake never happens twice
- Claude gets smarter over time

✱ Mark returns!

Prompt

From now on, whenever I correct you, save it as its own .md file at ~/.claude/projects/{project}/memory/, prefixed with feedback_, user_, project_, or reference_. Index everything in MEMORY.md.

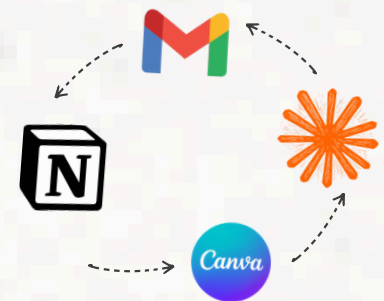

Copy & Paste

Turn Workflows into One-Command Skills

- One short command runs an entire process across multiple tools
- No more typing a 200-word prompt every single time

Prompt

Turn this workflow into a `/ {name}` skill: [describe trigger, inputs, outputs]. Create `~/.claude/skills/{name}/SKILL.md`, wire the MCP connectors I need (**Notion, Gmail, Drive, etc.**), and make it usable from any chat.

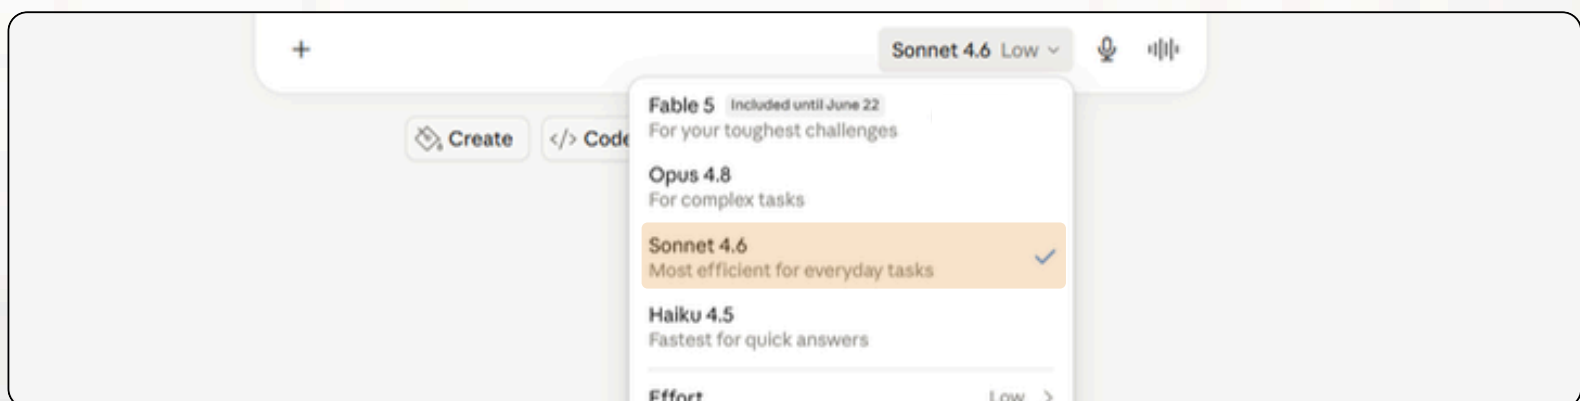

Copy & Paste

Build a Team of Specialized Agents

- Each agent gets one file and one job
 - Use Opus for analysis and planning
 - Use Sonnet for execution
- Add a quality check that rejects anything below 95%

Prompt

Build me an agent team for **[process]**. Create one .md file per specialist at ~/.claude/agents/. Use Opus for analysers and planners. Use Sonnet for executors and doers. Add a 95/100 QA gate that fails any work below the standard.

Copy & Paste
