Introduction

Most people use ChatGPT wrong

They open it, type a question like they would Google, get a generic answer, and close the tab. They never customize it. Never give it context. Never learn how to prompt it properly. And then they wonder why it does not feel that useful.
This bundle changes that entirely.

What you are holding is a complete system — six chapters that take you from setting up ChatGPT correctly for the first time, all the way to mastering the frameworks and templates that make it genuinely powerful. Every chapter builds on the last. Every prompt is ready to use. Every framework has been designed to produce results, not just responses.

What Is ChatGPT — Really?

ChatGPT is an AI assistant built by OpenAI. It can write, research, analyze, code, brainstorm, summarize, translate, and reason across almost any subject — instantly, at any time, in any language.
But here is what most people miss: ChatGPT is not a search engine. It is not a calculator. It is a thinking partner. The quality of what it gives you is almost entirely determined by the quality of what you give it.
That is what this bundle teaches you. Not just how to use ChatGPT — but how to use it well.

Who This Bundle Is For

This bundle was built for three types of people.
The complete beginner who has heard about ChatGPT but does not know where to start. You will find everything you need in Chapter 1 — a clear, step-by-step setup that takes five minutes and immediately makes ChatGPT feel like a different tool.
The business owner or professional who already uses ChatGPT occasionally but wants to get serious results. Chapters 2 and 5 are built for you — real prompts and templates you can use directly in your business today.
The power user who wants to understand the underlying frameworks behind great prompting — not just copy prompts, but build them from scratch for any situation. Chapters 3, 4, and 6 will take you there.
Wherever you are starting from, this bundle meets you there and takes you further.

How to Use This Bundle

Read it in order the first time. Setup first, prompts second, frameworks third. Each chapter is designed to make the next one more useful.
After that, use it as a reference. Come back to Chapter 2 when you need a business prompt. Come back to Chapter 4 when you want to build a custom framework. Come back to Chapter 6 when you want to understand the full picture of what ChatGPT can do.
One rule: do not just read. Open ChatGPT as you go and try every prompt and framework on something real. That is the only way this knowledge becomes a skill.
Let's start.

CHAPTER 1

How To Set Up Your ChatGPT

Most people skip the setup. That is the first mistake.
A properly configured ChatGPT behaves less like a generic AI assistant and more like a second brain that knows your context, your goals, your communication style, and your preferences. Setup takes five minutes.

The difference it makes lasts every session from that point forward.

Here is how to do it correctly:

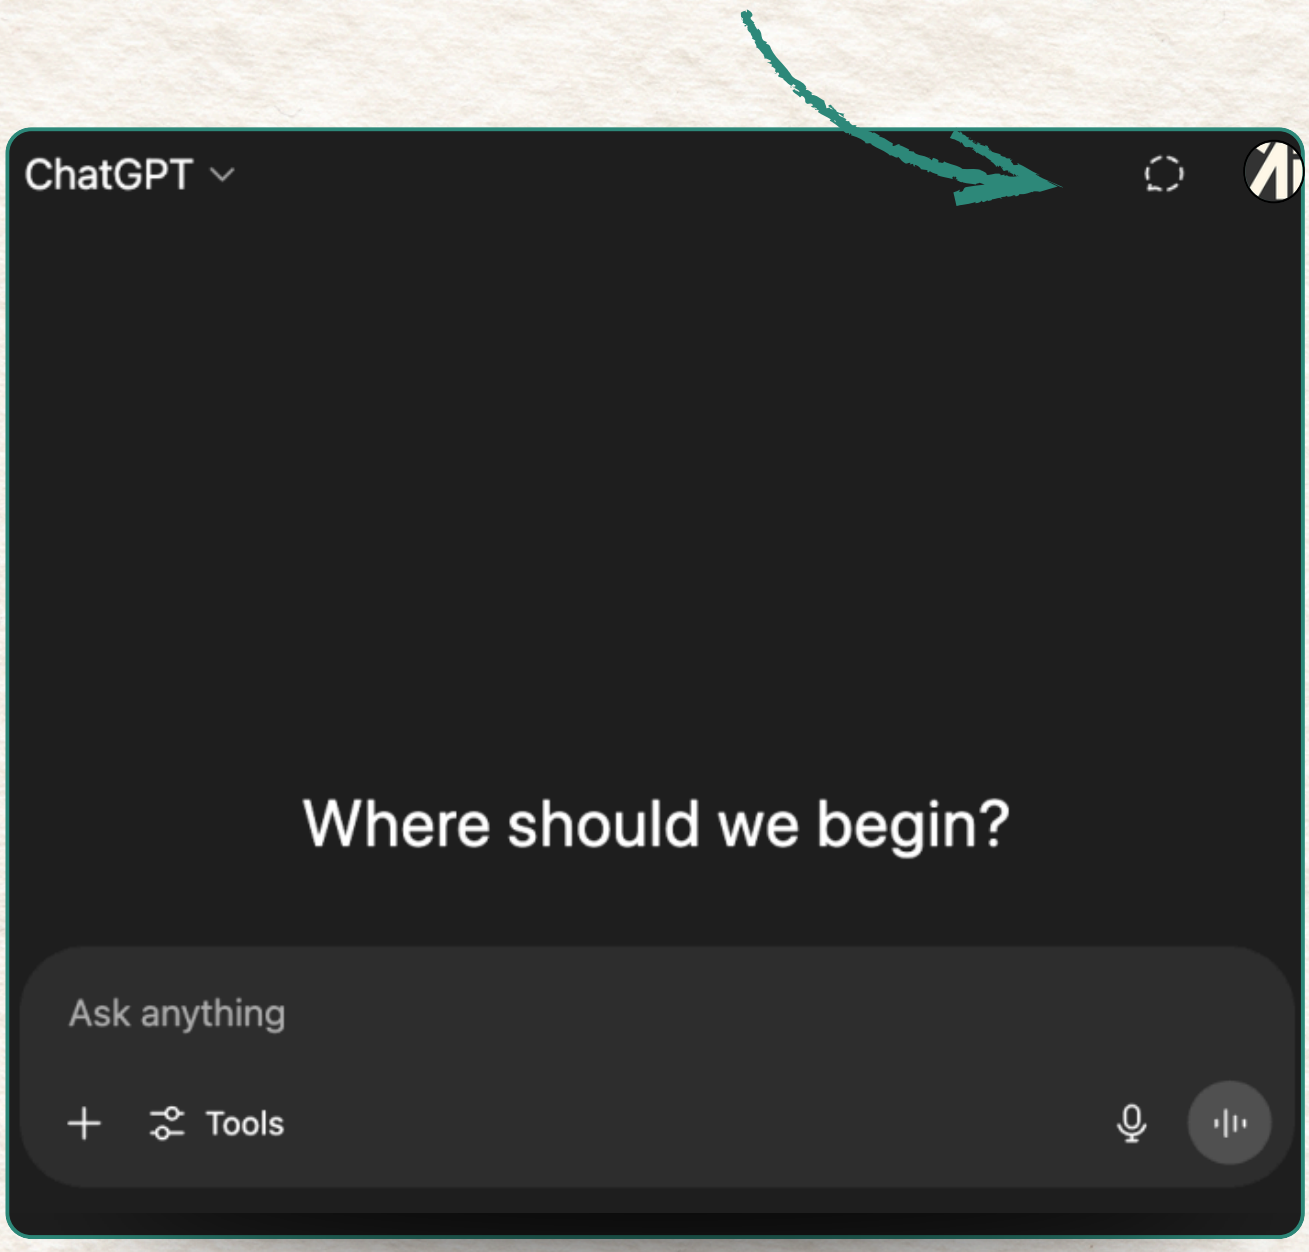

1. Go to ChatGPT and open your account settings
2. Click "Customize ChatGPT" and fill in both boxes with real, specific information about you
3. Enable Memory so ChatGPT learns your context over time
4. Choose the plan that matches your usage level
5. You are now set up. Every session from here is smarter than it would have been.

Swipe left to get the full process

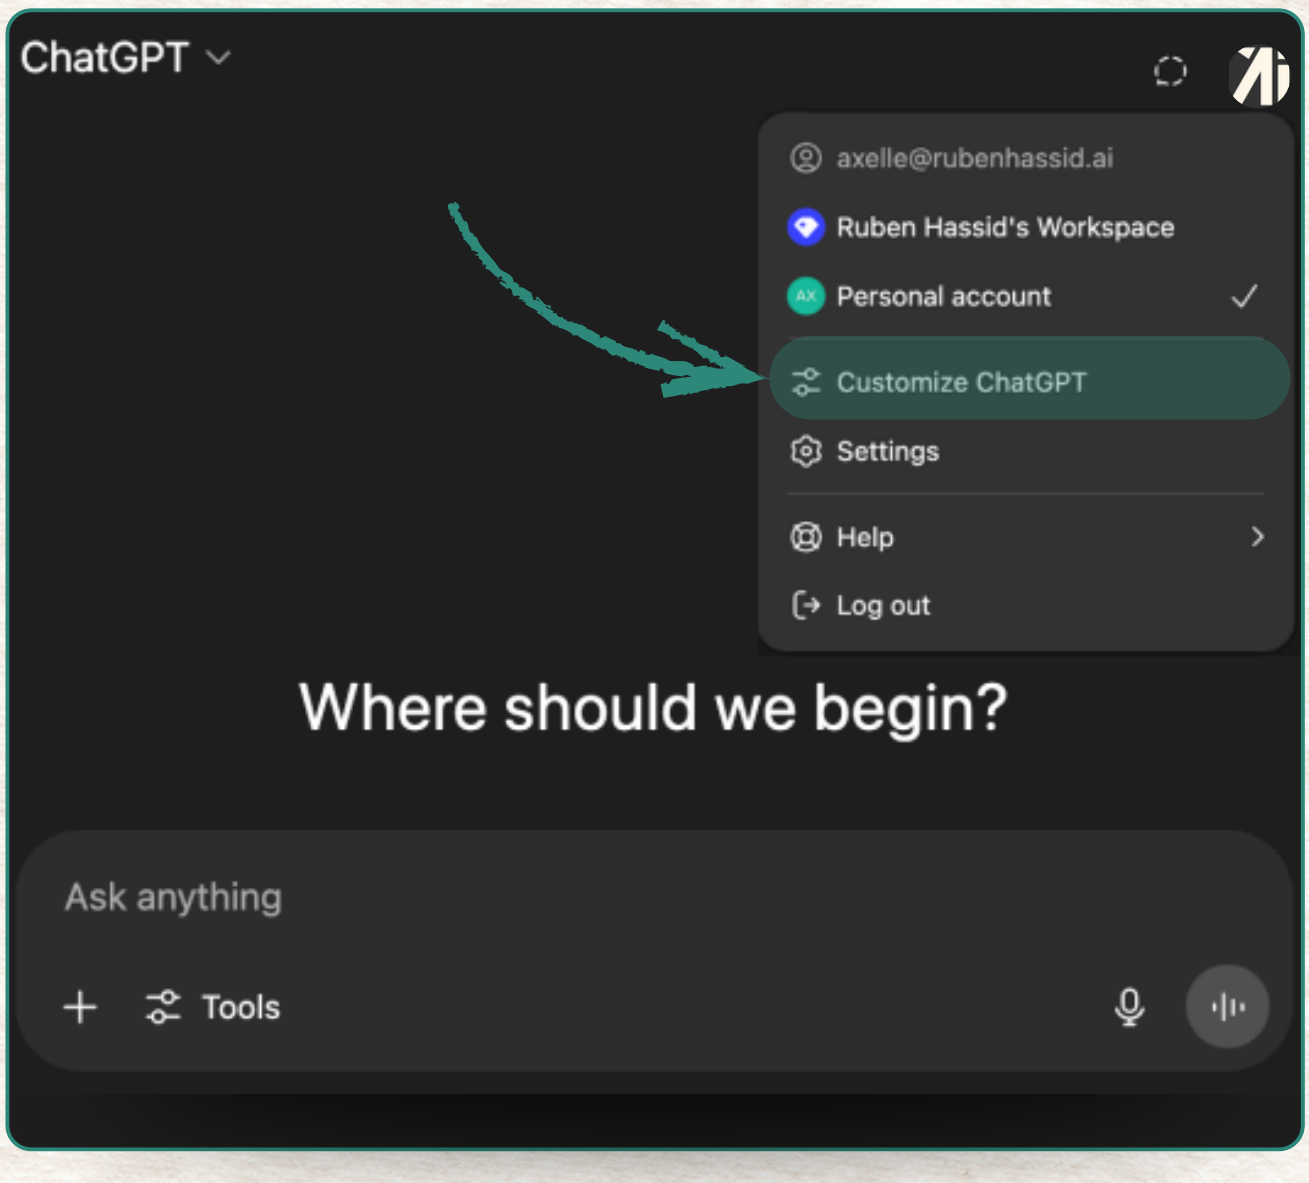

1 Go to ChatGPT

- Turn ON **Custom instructions**. Click on your name (up right)

2 Click Customize ChatGPT

- It’s the fastest way to make ChatGPT work like your second brain instead of a generic AI assistant

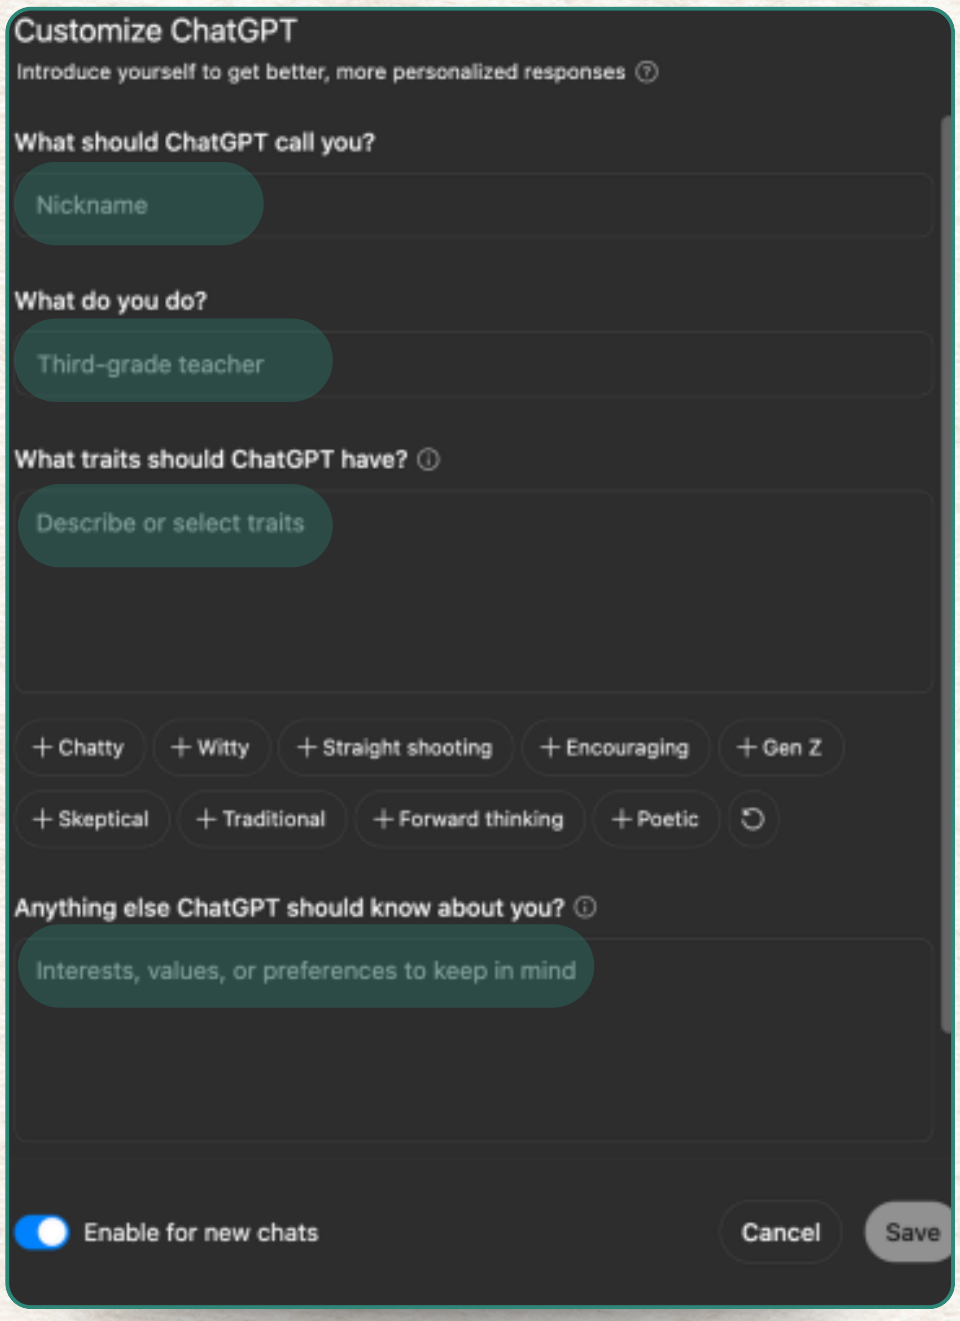

3 Fill these boxes

- The more you share, the more ChatGPT tailors answers to your workflow

- Add your nickname →
- Eg: Teacher →

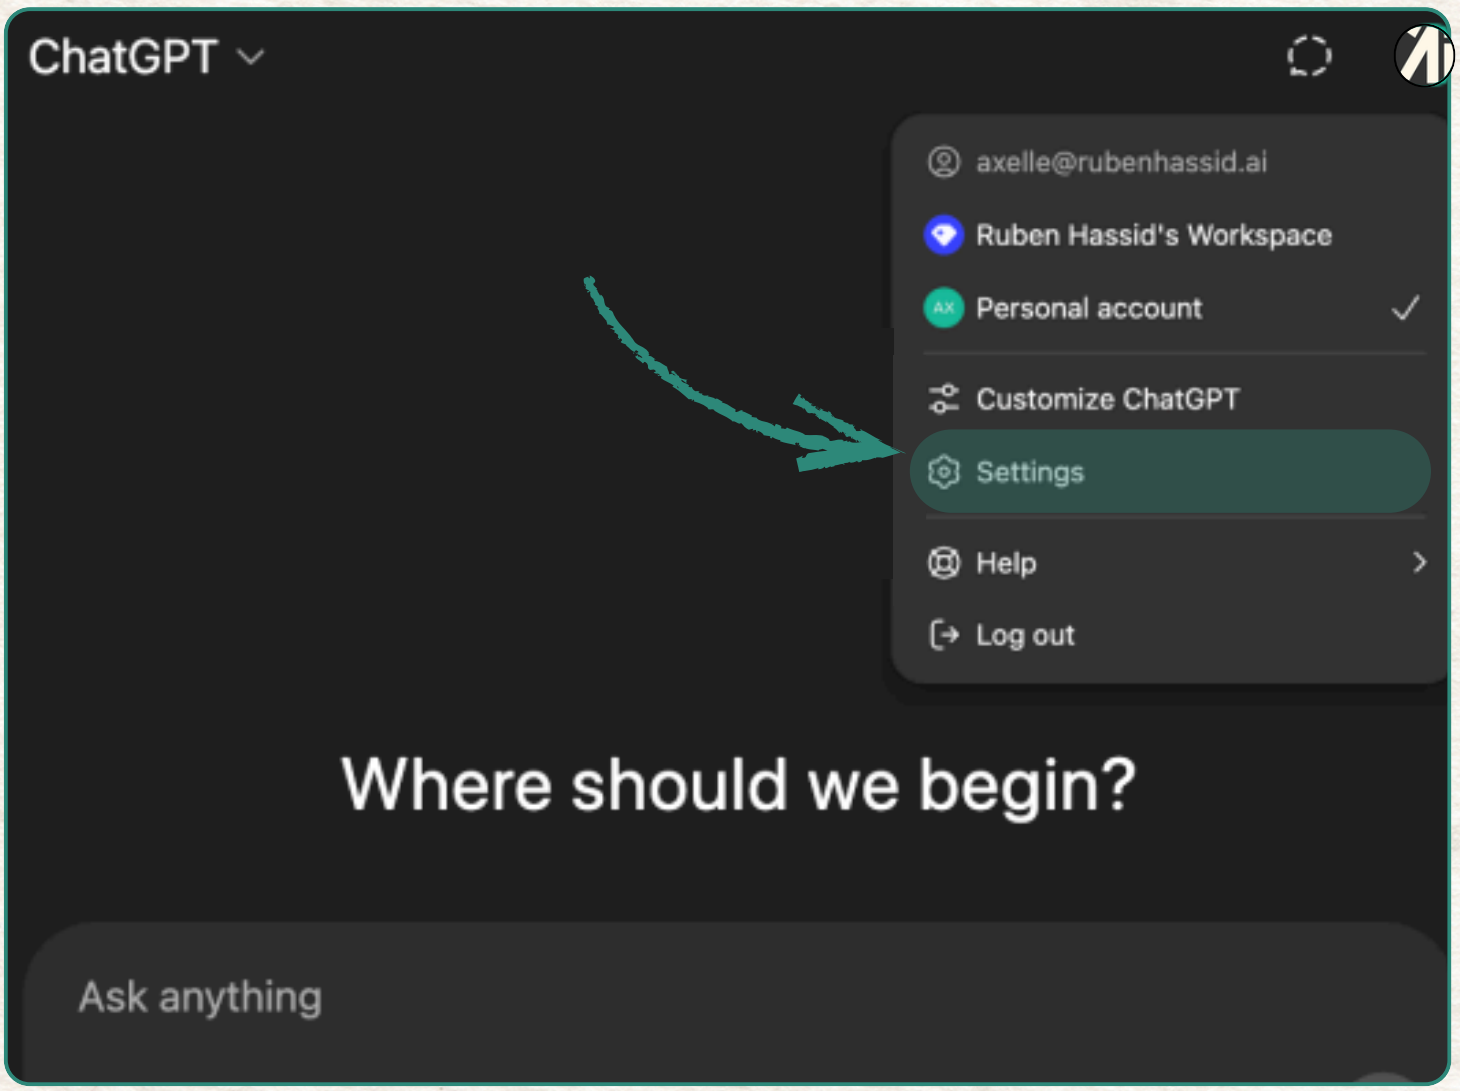

- Eg: Be direct. →
- Avoid fancy jargon.

- Give more details: Interests, values... →

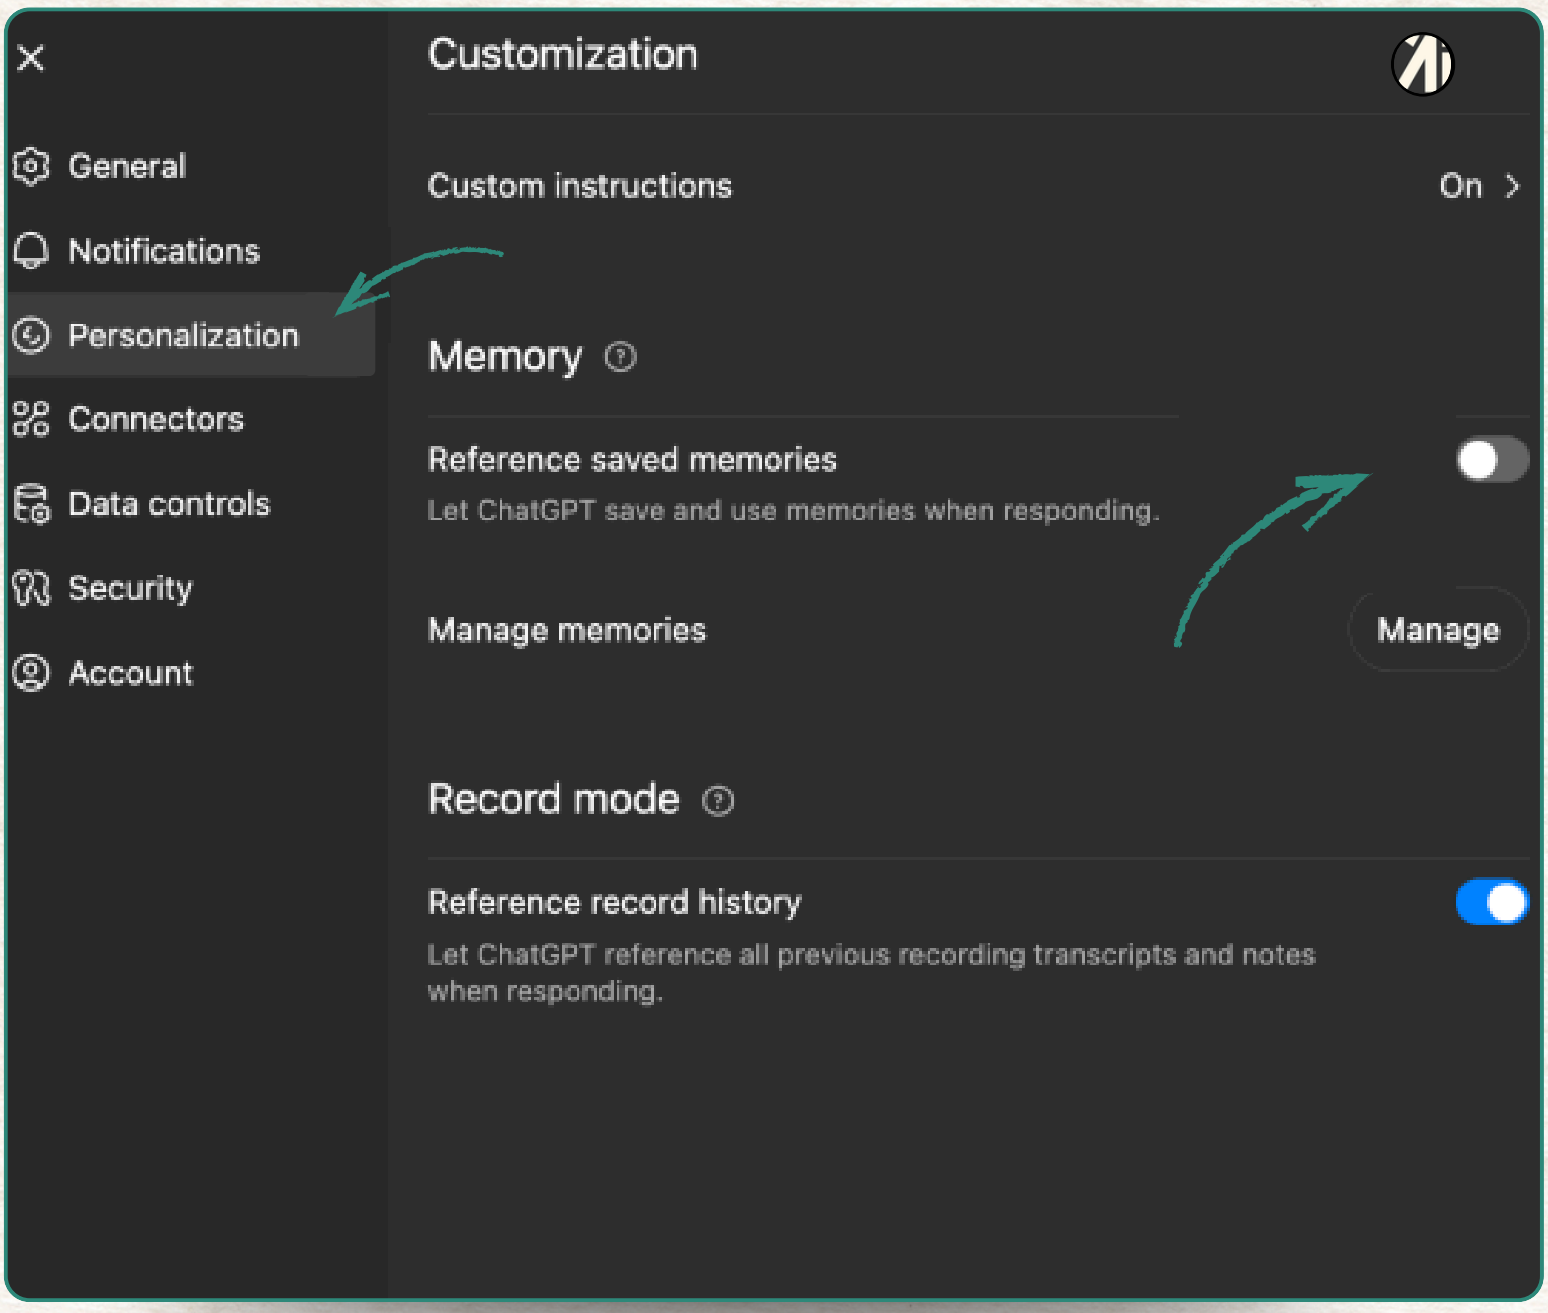

4 Enable ‘Memory’

- The more you share, the more ChatGPT tailors answers to your workflow

5 How to turn it ON

- Go to settings → Personalization Find ‘Memory’ →Toggle ON

CHAPTER 2

10 ChatGPT Prompts For Business Scaling

Double your growth game — easily

These are not generic prompts. Each one is designed to produce a structured, actionable output you can use directly in your business. Replace the brackets with your real information and run them as written

Here is the full prompts that inside this chapter

1. Market Expansion Strategy Blueprint
2. Customer Acquisition Playbook
3. Pricing Model Optimization
4. Business Process Automation Plan
5. Sales Funnel Engineering
6. Scaling Team Structure and Hiring Plan
7. Product Differentiation Strategy
8. Scaling Content and Distribution Engine
9. Investor-Ready Financial Projections
10. Strategic Partnership Development Plan

Swipe left to copy & paste it

Market Expansion Strategy Blueprint

Prompt

You are my strategic consultant. I run a [type of business: e.g., SaaS platform for small businesses] currently generating [current revenue level]. I want to expand into [new market/region/industry]. Create a step-by-step market expansion plan that includes:a) market size analysis with data points, b) competitor benchmarking, c) customer personas in this new market, d) go-to-market strategy tailored to my business model, e) risks and mitigations, and f) a 90-day action plan. Format it as a structured blueprint with clear sections I can directly present to my team.

2 Customer Acquisition Playbook

Prompt

Act as a growth marketing strategist. I want to acquire [X number] of new customers in [time frame] for my [type of business]. Break down a complete customer acquisition playbook including: a) top 5 high-ROI acquisition channels, b) campaign ideas per channel, c) estimated cost per acquisition benchmarks, d) funnel structure from awareness to conversion, e) automation workflows to reduce manual work, and f) key metrics to track. Provide a prioritized roadmap from quick wins to long-term sustainable strategies.

3 Pricing Model Optimization

Prompt

Act as my revenue optimization advisor. I currently charge [existing pricing model] for my product/service. Analyze and suggest optimized pricing models such as tiered pricing, freemium, value-based, or usage-based. Include competitor pricing insights, psychological pricing tactics, and A/B test ideas. Provide at least 3 alternative pricing models with pros/cons and recommend which one will maximize both revenue and customer lifetime value. Present the final output in a decision-making framework.

4 Business Process Automation Plan

Prompt

Pretend you are my operations consultant. I want to scale my business without dramatically increasing headcount. Analyze my core business processes: [list your processes like sales, onboarding, customer support, finance, etc.]. Identify areas that can be automated using AI, no-code tools, or integrations. Provide a detailed automation plan with: a) recommended tools, b) estimated cost savings, c) implementation roadmap, and d) potential risks. Format as a 3-phase rollout plan (short-term, mid-term, long-term).

5 Sales Funnel Engineering

Prompt

Pretend you are my operations consultant. I want to scale my business without dramatically increasing headcount. Analyze my core business processes: [list your processes like sales, onboarding, customer support, finance, etc.]. Identify areas that can be automated using AI, no-code tools, or integrations. Provide a detailed automation plan with: a) recommended tools, b) estimated cost savings, c) implementation roadmap, and d) potential risks. Format as a 3-phase rollout plan (short-term, mid-term, long-term).

6 Scaling Team Structure and Hiring Plan

Prompt

You are my HR and org design consultant. My company currently has [number of employees] and we aim to scale revenue from [X] to [Y] within [timeframe]. Design a scalable org structure that aligns with my growth goals. Suggest which roles to hire next, in what order, and the estimated salary bands. Include frameworks for delegation, leadership layers, and performance measurement. Provide a 12-month hiring roadmap with quarterly milestones.

7 Product Differentiation Strategy

Prompt

Act as a product strategist. My business operates in [industry]. Analyze my product/service against top 5 competitors. Identify differentiation opportunities across features, brand positioning, customer experience, and pricing. Suggest at least 3 unique positioning angles that will allow me to stand out and command higher market share. Format the response as: competitor table -> differentiation gaps -> strategic positioning options -> recommended positioning statement.

Scaling Content & Distribution Engine

Prompt

Pretend you are my content growth manager. My business niche is [insert niche]. Design a content engine that can scale traffic and brand authority. Include:
a) long-form pillar content ideas, b) short-form repurposing plan across LinkedIn, YouTube, TikTok, etc., c) SEO keyword clusters, d) partnerships and guest content opportunities, e) tools for distribution automation. Provide a weekly content calendar template for 90 days that balances traffic growth with lead generation.

Financial Scaling Model & Forecast

Prompt

Act as my CFO. I currently generate [monthly recurring revenue or annual revenue]. Build a 3-year financial scaling model that includes: revenue projections under conservative, moderate, and aggressive growth scenarios; cost breakdowns (fixed and variable); profit margin analysis; and cash flow forecasts. Suggest KPIs to track scaling efficiency (LTV:CAC ratio, churn, gross margin). Provide insights into when to reinvest in growth vs. secure profitability. Present as a structured forecast table with executive summary.

Strategic Partnerships & Distribution Channels

Prompt

You are my business development strategist. I want to scale faster through partnerships. Based on my industry [insert details], identify at least 10 high-potential partnership opportunities (platforms, influencers, distributors, affiliate networks, or complementary businesses). For each, suggest: value exchange, potential risks, expected ROI, and outreach strategy. End with a prioritized partnership roadmap for the next 6 months, including sample outreach message templates.

CHAPTER 3

9 Powerful ChatGPT Prompt Frameworks

A prompt framework is a reusable structure. Instead of writing every prompt from scratch, you fill in a template — and the output quality goes up dramatically because the structure forces clarity

These 9 frameworks cover the most common situations you will face when using ChatGPT professionally

Here are the full frameworks that are inside this chapter

- Framework 1: ROLE + TASK + FORMAT
- Framework 2: CONTEXT + GOAL + CONSTRAINT
- Framework 3: BEFORE + AFTER + BRIDGE
- Framework 4: STEP-BY-STEP BREAKDOWN
- Framework 5: EXPERT PANEL
- Framework 6: DEVIL'S ADVOCATE
- Framework 7: REWRITE AND IMPROVE
- Framework 8: SCENARIO SIMULATION
- Framework 9: SUMMARIZE AND EXTRACT

Swipe left to get the full process

APE

Perfect for quick instructions with clear goals

A → Action: What should ChatGPT do?

P → Purpose: Why are you doing this?

E → Expectation: What should the final output include?

Prompt Format

[Action] to [Purpose] so that [Expectation].

Prompt Example

Summarize this blog to save time so that I can post it on LinkedIn easily.

2 ROSES

- Use this when you need a structured, styled response

R → Role: Who should ChatGPT act as?

O → Objective: What is the goal?

S → Steps: How should the output be structured?

E → Example: Provide a sample if you can

S → Style: Define tone or voice

Prompt Format

Act as a [Role] with the objective of [Objective]. Break it into [Steps] with [Examples], and keep the [Style].

Prompt Example

Act as a LinkedIn content coach with the objective of helping solopreneurs grow faster. Break it into 3 steps with clear examples, and keep the tone friendly and direct.

3 TAG

- Best for clear, no-fluff marketing or optimization tasks

T → Task: What's the task?

A → Action: What needs to be done?

G → Goal: What's the desired outcome?

Prompt Format

Your task is to [Task]. Do this by [Action]. The goal is [Goal].

Prompt Example

Your task is to improve our email open rates. Do this by suggesting subject lines, timing, and personalization tips. The goal is to increase open rates by 15% this quarter.

4 IDEA

- Ideal for content creators

I → Intent: What are you trying to create?

D → Details: Topic or context

E → Expectation: Structure or length

A → Audience: Who's this for?

Prompt Format

I want to create [Intent] about [Details]
that is [Expectation] for [Audience].

Prompt Example

I want to create a carousel about ChatGPT prompts
that is 6 slides long and easy to read for freelancers.

PRO

Use this when you're stuck and need help

P → Problem: What are you struggling with?

R → Request: What do you want help with?

O → Outcome: What result are you expecting?

Prompt Format

I'm facing [Problem]. Can you [Request] so I can [Outcome]?

Prompt Example

I'm facing burnout with daily posting. Can you suggest a 3-day content plan so I can stay consistent?

6 CLEAR

- Great for writing content with emotional tone

C → Context: Situation or background

L → Length: Short, Medium, Long

E → Emotion: Tone – inspiring, bold, funny?

A → Action: What should the reader do?

R → Result: Desired impact

Prompt Format

Given [Context], write a [Length] piece that feels [Emotion], and should [Action] to achieve [Result].

Prompt Example

Given a product launch, write a medium-length post that feels excited, and should create urgency to achieve 50 signups.

7 STAGE

For project planning or email writing

- **S** → Situation: What's happening now?
- **T** → Task: What needs to be done?
- **A** → Action: How should it be handled?
- **G** → Goal: What are you trying to achieve?
- **E** → Expectation: Format, tone, or specifics

Prompt Format

We are facing [Situation], and I need to [Task]. Please [Action] to help us achieve [Goal], and make sure it follows this [Expectation].

Prompt Example

We're facing low engagement this week, and I need to post something relatable. Please use storytelling to help us reconnect with our audience, and make sure it's casual and under 150 words.

8 PEEL

- To make your writing more relatable and human

P → Persona: Who is the user?

E → Environment: Where are they mentally or physically?

E → Emotion: What are they feeling?

L → Language: Tone and style of writing

Prompt Format

Write for [Persona] in [Environment] who feels [Emotion] using [Language].

Prompt Example

Write for a Early-stage founder working solo at night who feels tired but motivated using a empathetic and encouraging tone.

9 DRIP

For precision and control over ChatGPT outputs

D → Do: What do you want it to do?

R → Result: What output are you expecting?

I → Instructions: Style, structure, or order

P → Parameters: Word limit, tools, tone, etc.

Prompt Format

Please [Do] so we can [Result]. Follow these [Instructions] and stay within these [Parameters].

Prompt Example

Please write 5 subject lines so we can boost email open rates. Follow curiosity, no clickbait and stay under 7 words, no emojis.

CHAPTER 4

5 Ultimate ChatGPT Prompt Frameworks

These five frameworks are more advanced. They are designed for complex, high-stakes tasks where the quality of your output matters most

Each one follows a multi-part structure that forces ChatGPT to think more carefully before responding

The right prompts turn ChatGPT into your ultimate time-saving tool

But most people don’t know how to get the best out of it.

“Here’s a Five advanced prompt frameworks, already selected for you, swipe left”

1 RTF Framework

Role

Define the ***specific role*** or perspective that ChatGPT should adopt.

Example

You are a sales rep for a software company, and you want ChatGPT to generate a sales pitch for a new software product.

2 BAB Framework

Before

Describe the ***current situation*** or problem.

Example

Our website has a high bounce rate and low conversation rate.

3 SCQA Framework

Answer

Expect a response that provides ***insights or answers*** the posed question.

Example

Provide a step-by-step guide with screenshots and clear instructions assist the customer.

5Ws and 1H Framework

Where

Define the ***location or context*** of the question or task.

Example

Select the appropriate marketing channels for reaching the target audience.

5 PS Framework

Solution

Request a response that offers a solution or addresses the problem.

Example

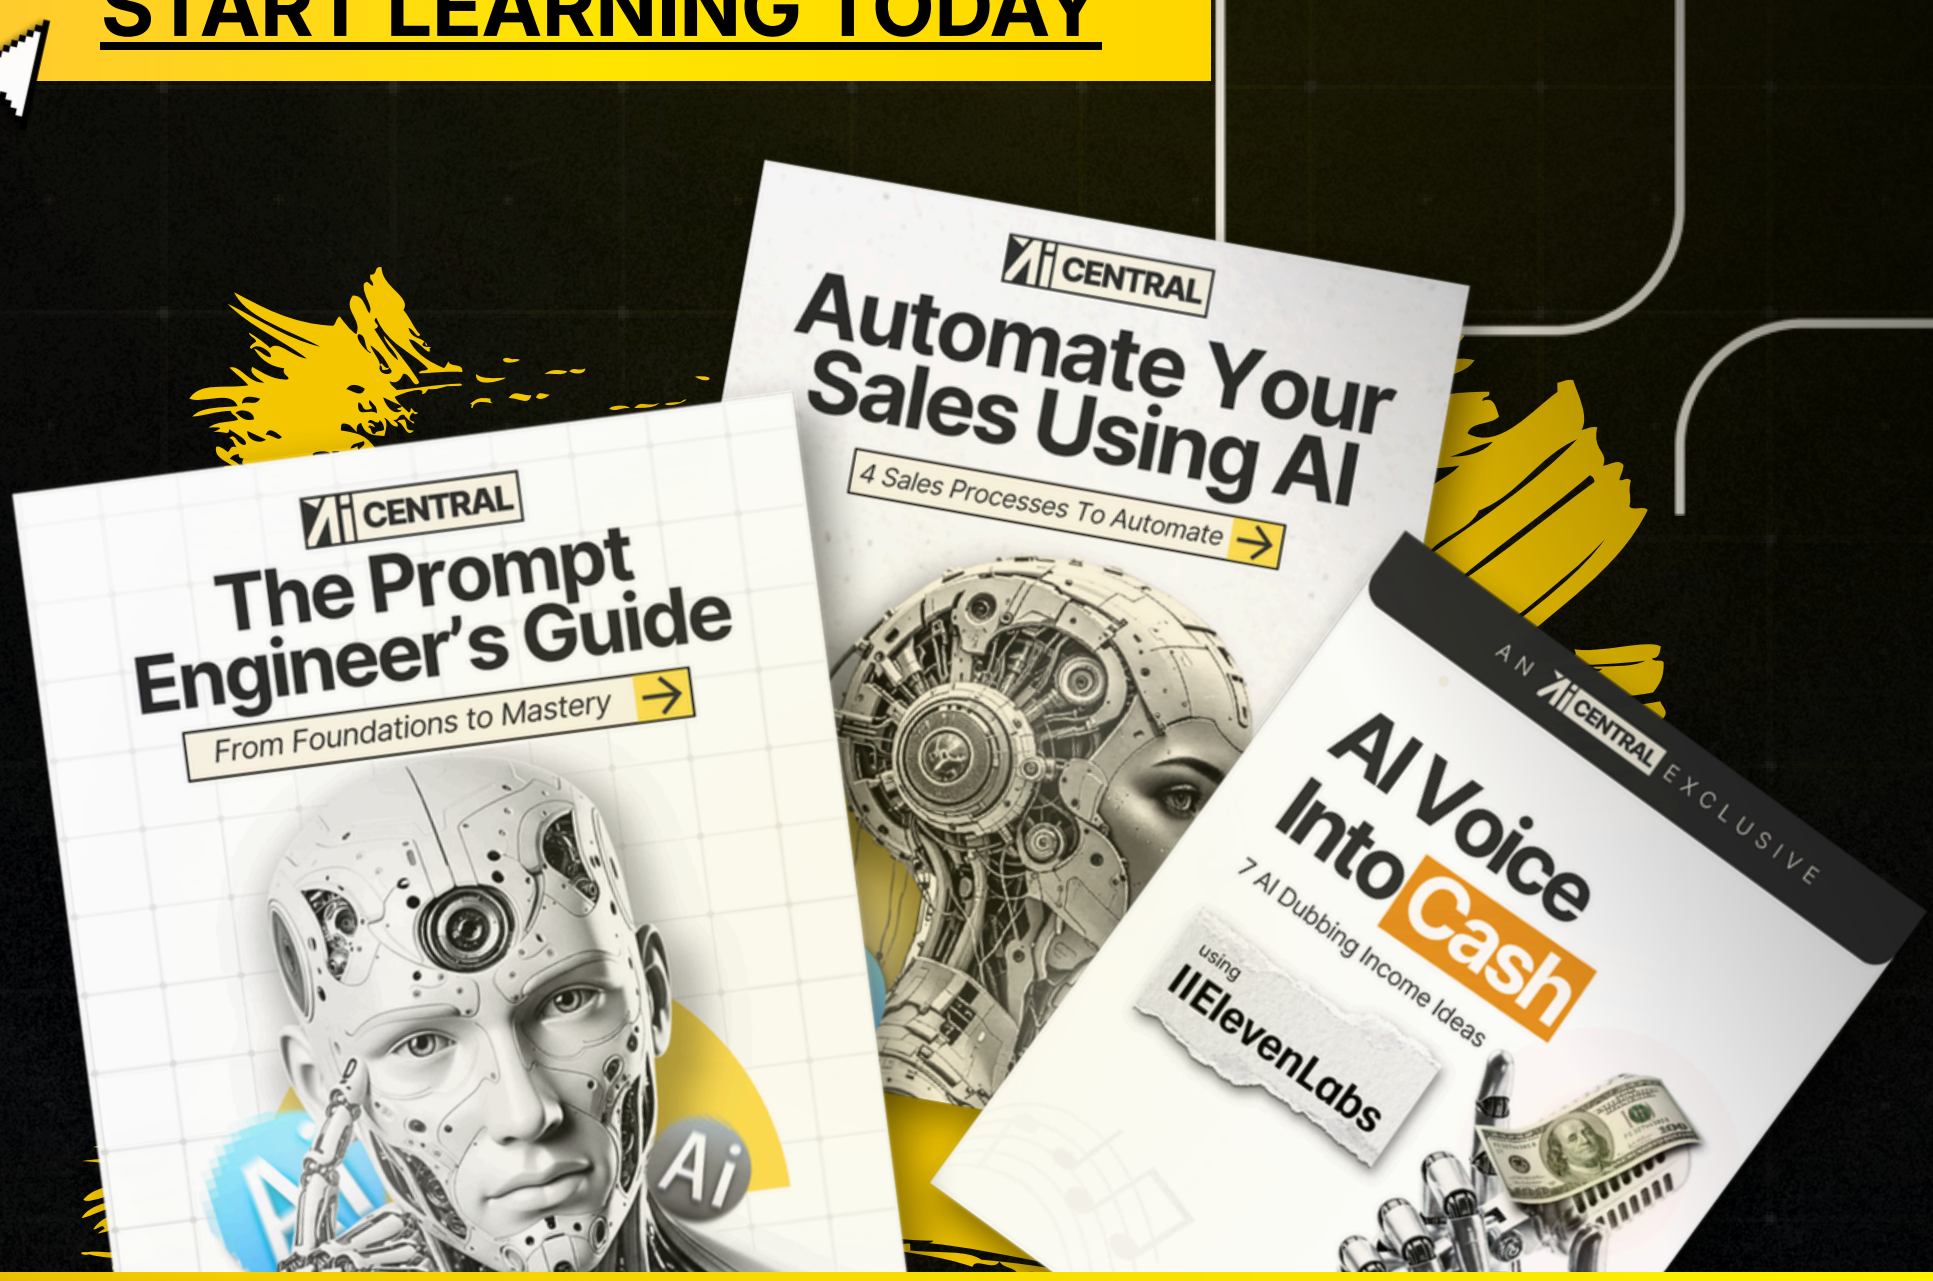

Propose strategies to reduce cart abandonment and increase conversation rates.

CHAPTER 5

14 ChatGPT Essential Prompt Templates

Why it matters: Sometimes you do not need a framework. You need a template that works right now

These 14 templates cover the most common professional use cases — writing, strategy, marketing, productivity, learning, and research. Each one is plug-and-play. You fill in your information, run the prompt, and get a result you can actually use. Blog posts, cold emails, competitor analysis, meeting agendas, ad copy, SOPs, weekly plans — all covered. Consider this chapter your permanent prompt reference library

1 Intelligent Concept Explainer

Prompt

*Explain **[complex topic]** to me like I'm intelligent but unfamiliar with the jargon. Use analogies from **[field I know well]**. Don't dumb it down. Make it accessible*

Copy & Paste

2 Brutally Honest Critic

Prompt

*You are a harsh but fair critic. Review this **[paste content]**. What's weak? What's unclear? What's missing? Be direct*

Copy & Paste

3 Deep-Dive Expert Interview

Prompt

*You are a **[specific expert]**. Answer my questions with real-world tradeoffs, constraints, and what's overrated or underrated about **[topic]***

Copy & Paste

4 Strategic Meeting Preparation

Prompt

*I have a meeting about **[topic]**. Predict the top questions they'll ask, objections they might raise, and one smart question I should ask back*

Copy & Paste

5 Goal-Oriented Reverse Brief

Prompt

*I want to achieve **[goal]**. Before giving advice, ask me 5 clarifying questions about constraints, resources, timeline, and priorities*

Copy & Paste

Academic Research Synthesizer

Prompt

*I'm researching **[topic]**. Here are my sources: **[paste]**. Synthesize the main consensus, disagreements, gaps, and follow-up questions*

Copy & Paste

7 Weighted Decision Matrix

Prompt

*I need to decide between **[option A]** and **[option B]**. Create a decision matrix with weighted criteria and surface hidden assumptions*

Copy & Paste

8 Plain English Jargon Translator

Prompt

*Translate this into plain English: **[paste]**. Then give me a one-sentence summary and 3 smart questions I could ask*

Copy & Paste

9 Efficiency Email Speedrun

Prompt

*Write an email to **[recipient]**. Context: **[short]**. Tone: **[tone]**. Length: under **[X]** words. Avoid: **[constraints]***

Copy & Paste

Technical Code Explainer

Prompt

*Explain this code: **[paste]**. What it does. How it works line by line. Potential issues or edge cases*

Copy & Paste

11 Strategic Idea Stress Test

Prompt

*Here's an idea: **[paste]**. Play devil's advocate. List flaws, assumptions, and what's likely underestimated*

Copy & Paste

Multi-Channel Content Repurposer

Prompt

Repurpose this content into: – 10 short insights – 3 LinkedIn posts - 5 email subject lines. Keep the core message intact

Copy & Paste

13 Cross-Domain Analogy Generator

Prompt

*Explain **[concept]** using an analogy from **[familiar domain]**. Keep it accurate and memorable*

Copy & Paste

Strategic Second-Order Thinking

Prompt

*If **[event]** happens, what happens next? Then what happens after that? Continue*

Copy & Paste

CHAPTER 6

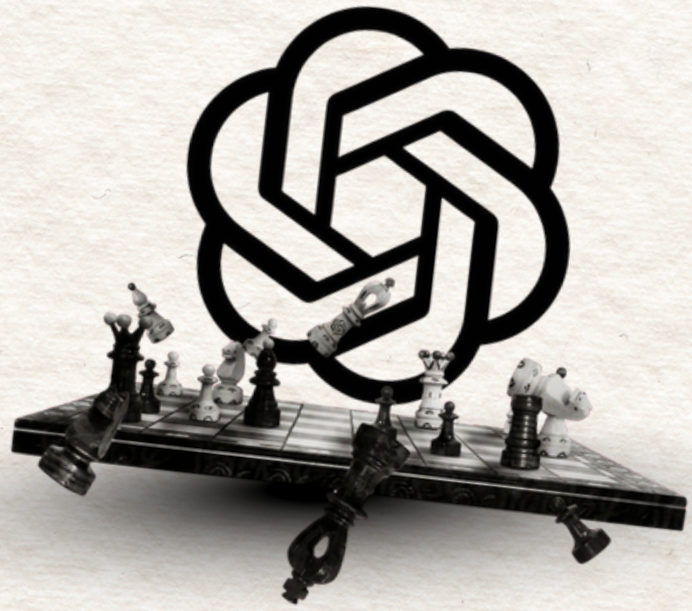

The Complete ChatGPT Mastery Guide

Why it matters: This is the full picture. Everything you need to become a genuine power user — in one chapter.
You will learn the advanced five-part prompting structure that produces consistently high-quality outputs for complex tasks.

You will ***discover the built-in features most users never touch — Deep Research, Agent Mode, Canvas, Codex, Sora, and more***. You will get the top GPT integrations worth adding, image and video generation templates, best practices, and an honest breakdown of what ChatGPT does well and where it falls short.

By the end of this chapter, you will not just know how to use ChatGPT. You will know how to get the most out of everything it can do.

Supported Output Formats

- **ChatGPT can deliver results in various formats:**
  - Text
  - Images
  - Plain text (.txt)
  - Markdown (.md)
  - PDF (.pdf)
  - Word documents (.docx)
  - Excel spreadsheets (.xlsx)
  - CSV files (.csv)

The Ultimate Prompt Framework

Structure your prompts for maximum clarity and effectiveness:

- Role – Define who ChatGPT should act as
- Task – State exactly what needs to be done
- Context – Provide background, constraints, and boundaries
- Reasoning – Explain how ChatGPT should think internally
- Output Format – Specify structure (table, list, markdown, etc.)
- Stop Conditions – Define when the task is complete

Powerful Built-in Features

- Act as [ROLE] focused on [TASK]

  Context: [Insert background, constraints, and exclusions here]

  Reasoning: [Explain how ChatGPT should internally validate, analyze, and optimize before responding]

  Output Format: [Specify table, list, bullets, markdown, etc.]

  Stop Conditions: [Define when the task is complete and requirements are satisfied]

Example Prompt

- Act as a productivity consultant focused on creating personalized daily routines for remote workers

  Context: The routine must balance productivity, wellness, and flexibility. Exclude cliché advice like “wake up early” and focus on realistic, modern practices

  Reasoning: Cross-check suggestions with evidence-based methods (Pomodoro, deep work, habit stacking) and adapt for remote work challenges. Optimize for balance and sustainability

  Output Format: Provide the routine as a structured daily timeline with time blocks, activity descriptions, and purpose

  Stop Conditions: Task is complete when one validated, evidence-backed, realistic daily routine is created in a clear timeline format

Powerful Built-in Features

1. Deep Research
Generate well-researched, in-depth articles

2. Shopping Research
Interactive assistant for product comparisons, prices, and reviews

3. Create Image
Generate images using OpenAI’s advanced image models

4. Agent Mode
Let AI work autonomously to complete tasks on your behalf

5. Add Sources
Connect and collaborate with your digital workspace tools

More Essential Features

6. Study and Learn
Step-by-step learning assistance on any topic

7. Web Search
Access live internet data for up-to-date information

8. Canvas
Write and code collaboratively with AI in a shared workspace

9. Apps
Tag and integrate external applications directly in ChatGPT

10. GPTs
Build or use specialized AI assistants for niche use cases

11. Sora
Generate videos with AI using OpenAI's Sora 2 model

Organization & Productivity Tools

12. Library
Archive and access all your generated images

13. Projects
Create folders to organize and save chats long-term

14. Codex
Cloud-based AI coding agent for reading, editing, testing, and reviewing code

15. Search Chats
Quickly find previous conversations using keywords

Top Recommended GPTs & Integrations

- **SciSpace**
  Accelerate research with AI-powered analysis

- **Wolfram**
  Access computation, math, and real-time data

- **Video GPT by VEED**
  Generate and edit videos with text prompts

- **Canva**
  Design presentations, logos, and social media content effortlessly

- **Logo Creator**
  Generate professional logo designs and app icons

- **Data Analyst**
  Upload files for AI-powered data analysis and visualization

+ More Valuable GPTs

- **Copywriter GPT**
  Marketing, branding, and ad strategy assistant

- **Whimsical Diagrams**
  Visualize concepts with flowcharts and mind maps

- **Universal Primer**
  Rapid learning tool for complex subjects

- **Grimoire**
  AI code wizard for programming assistance

OpenAI's Advanced Image Model

- **DALL·E 3 –** The latest state-of-the-art image generation model featuring:
  - High-fidelity, detailed visuals
  - Improved prompt adherence
  - Better detail preservation during edits
  - Significantly faster generation speeds

Image Generation Prompt Template

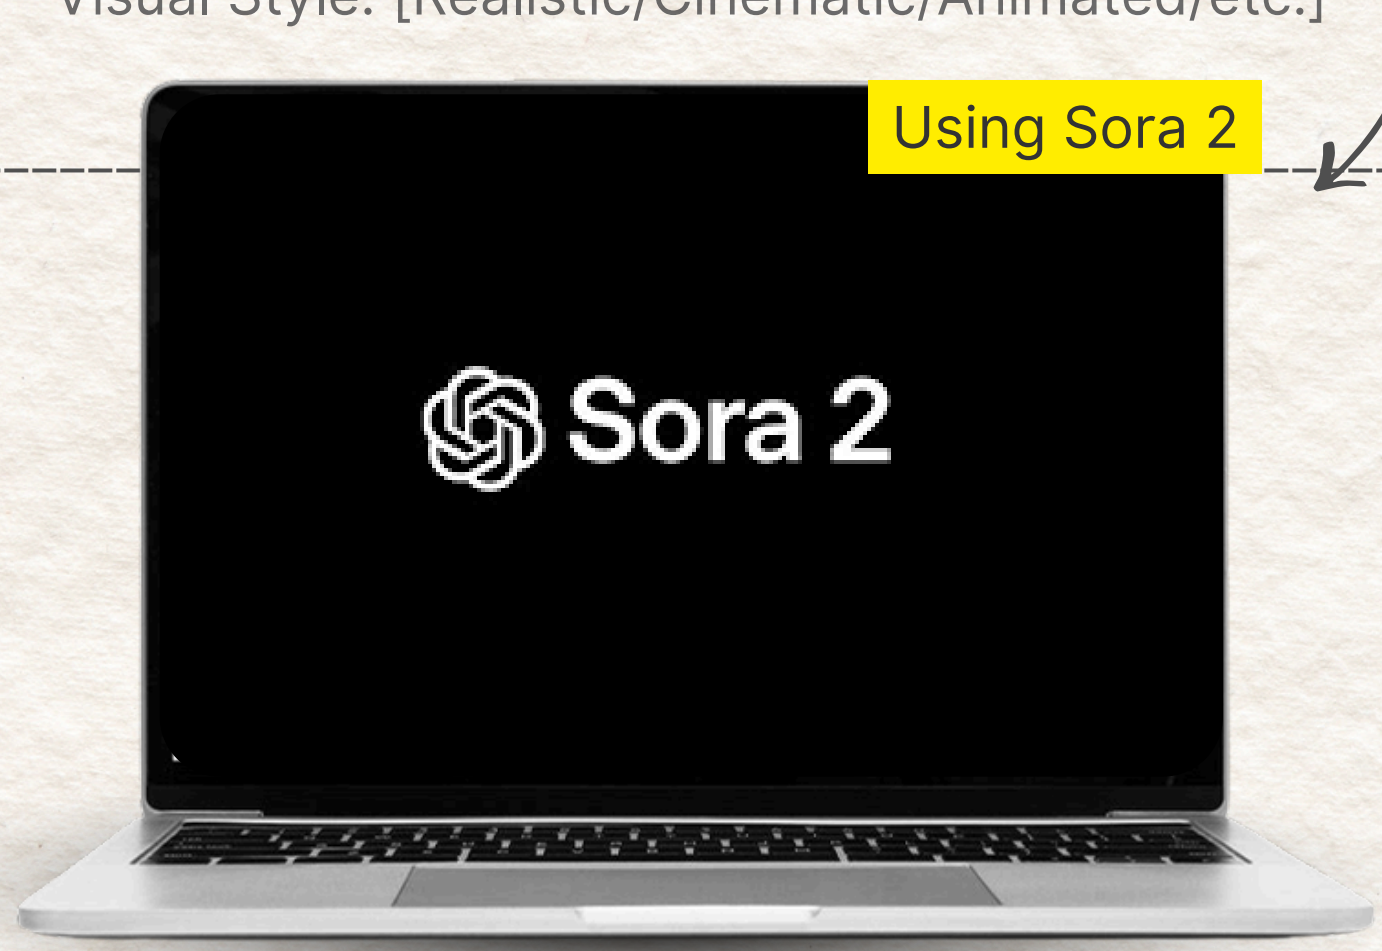

High-quality, visually compelling image based on:
- Subject & Core Concept: [Describe main subject, action, intent]
- Visual Style & Mood: [Artistic style, emotional tone]
- Composition & Framing: [Camera angle, perspective, distance]
- Lighting & Color: [Lighting setup, time of day, color palette]
- Environment & Background: [Setting, context, textures]
- Detail Level & Realism: [Material quality, sharpness]
- Constraints: [Elements to avoid, accuracy requirements]

Ensure coherence, aesthetic refinement, and alignment with description

Video Generation Prompt Template

- [Style/Genre] video of [Subject/Scenario] set in [Location/Environment] with [Camera Angle/Movement].

  Mood: [Tone/Mood]
  Color Scheme: [Color Palette]
  Duration: [Video Length]
  Special Details: [Effects, transitions, lighting]
  Visual Style: [Realistic/Cinematic/Animated/etc.]

Best Practices for Better Results

1. Add clear background context
2. Request step-by-step explanations
3. Break questions into organized points
4. Specify desired output format with examples
5. Request file outputs when needed
6. Provide input files as required
7. Follow up iteratively for refinement
8. Include restrictions and boundaries

Do's

- Be specific and clear with your prompts
- Include relevant background context
- Follow up for improved results
- Experiment with different prompt frameworks
- Verify facts by checking sources

Don'ts

- Don't expect 100% accuracy
- Don't share sensitive personal information
- Don't rely on AI for legal or medical advice
- Don't copy-paste outputs without verification
- Don't treat AI responses as absolute truth

Advantages of Using ChatGPT

- Instant access to information and answers
- Significant time savings in writing and content creation
- 24/7 availability and multilingual support
- Enhanced brainstorming and creativity
- Translation and summarization capabilities

Limitations to Consider

- May produce inaccurate or misleading information
- Lacks true human creativity and emotional depth
- Can reflect biases from training data
- Over-reliance may impact critical thinking skills
- Not suitable for sensitive tasks without expert oversight

CONCLUSION

Final Word From AI Central

You just completed the AI Central ChatGPT Bundle.
And if you went through every chapter — not just skimmed it, but actually read it, tried the prompts, applied the frameworks — you now understand ChatGPT at a level that puts you ahead of the overwhelming majority of people using it today.

Why AI Central Made This Bundle
At AI Central, we believe the biggest problem with AI in 2026 is not access. Everyone has access. The problem is knowledge. Millions of people open ChatGPT every day and use maybe 10% of what it can actually do. They never set it up. They never learn a framework. They copy a prompt they found on social media, get a mediocre result, and move on.
We built this bundle to fix that.

Not with theory. Not with hype. With a practical, step-by-step system that t

You Are Now Part of the AI Central Community

This bundle is one piece of a much larger library.
At AI Central, we publish AI tutorials, prompt guides, tool breakdowns, and practical resources across every major AI platform — not just ChatGPT. If you want to go deeper on any topic covered in this bundle — or explore tools like Claude, Midjourney, n8n, Gamma, and dozens more — everything is waiting for you.

Visit cntral.ai/tutorials to unlock the full library. Visit cntral.ai/ebooks for free ebooks, prompts, and AI tool guides.
